

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Breslich's Series of Correlated Mathematics for High Schools and Junior Colleges

IT HAS STOOD THE TEST OF EXPERIENCE. TEACHERS
SAY IT IS UP TO THE MINUTE—PRACTICAL—SUPERIOR

Q When you make a school curriculum, you want the best. When you adopt a textbook in mathematics, you want the best. You want a book that has been developed in the class-room through a long period of years; that has been tested thoroughly year after year in the class-room, and revised as a result of this experience; that is the combined result of a corps of able mathematics teachers; that has had the benefit of criticism of disinterested experts in various phases of mathematics work; that embodies the latest approved teaching methods; that is successfully used by hundreds of high schools throughout this country and abroad.

A The making of a series of textbooks that will stand the strain of practical use is the work of a dozen years, rather than of two or three years. Breslich's series stands this test. It has been tried and proved. It stands on a bedrock which cannot be shaken. With it you and your mathematics department and your students will succeed.

ADVANCED ALGEBRA

By **W. C. BRENKE**, *University of Nebraska*

8vo.

196 pp.

\$1.60

DISTINGUISHING FEATURES

Review of four fundamental operations establishing connection with high school work.

Coördinates are introduced early and graphic methods are used freely.

Theory and use of logarithms are studied in connection with the theory of exponents.

Numerous exercises furnish drill and practice in handling formulas and teach the student to express mathematical ideas in algebraic form.

SHOWS NEW GAINS AND BIG LEADS FOR THESE BOOKS

Slichter—ELEMENTARY MATHEMATICAL ANALYSIS (New
Second Edition) - - - - - \$2.75

A text book for first-year college students which treats the various topics in freshman mathematics as belonging to a single science. The *new* Slichter combines in a single book work in trigonometry, college algebra, and analytic geometry. In this revision, simplification of the material has been the main end in view. The emphasis is on the notion of functionality.

Palmer and Leigh—PLANE AND SPHERICAL TRIGONOMETRY (With Tables) - - - - - \$2.00
Without Tables - - - - - \$1.25
Five-Place Logarithmic-Trigonometric Tables - - - - - \$1.00

March and Wolff—CALCULUS - - - - - \$2.50

Dowling—PROJECTIVE GEOMETRY - - - - - \$2.00

Wolff—MATHEMATICS FOR AGRICULTURAL STUDENTS - \$2.00

THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

All Kinds of Commercial Work

(Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our Imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

Mathematical Special—Premier of the Profession

No Other Typewriter Can Do This

Enables the *amateur* to write as neat appearing letters *from the very beginning* as the experienced operator.

The "Mathematical Special" model of the **MULTIPLEX HAMMOND** carries 120 distinct characters; about 30 additional ones can be made with simple combinations. "No other typewriter can do this." It has no equal in the mathematical profession.

Aside from these remarkable features, every **MULTIPLEX HAMMOND** "WRITING MACHINE"

carries two different styles of type, or two languages, in the one machine. "*Just Turn the Knob*" and change. There are more than fifty different languages in many sizes and styles which can be substituted in a few seconds.

The first paragraph, and the one following, show a few of the 365 different arrangements of types and languages (slightly reduced) *instantly changeable on the Multiplex Hammond*:

A Revelation in Typewriterdrom

The Multiplex Hammond is unquestionably the most remarkable typewriter in existence. *Why? Because of its versatility.*

Think of it—"Just Turn the Knob" and you can change from ordinary Roman to Italics—**INSTANTLY**—or from large Gothic to Miniature—**INSTANTLY**—or from English to Russian—**INSTANTLY**!

Note the 10 styles of type opposite, all written on the same machine.

Petite - for extra condensing
Miniature - for refined letters
Small Roman - neat business
Script - private correspondence
Medium Roman - general letters
Italic - emphasizing.
SPECIAL GOTHIC - CLEAN CUT
Large Gothic - sermons, lectures
Large Roman - sermons, lectures
Clarendon - new, attractive

Writes Anything, Anywhere, Any Way!

Business executives, sales managers, doctors, lawyers, advertising men, writers, druggists, linguists, students—men, women and children in all walks of life—find they can do clearer, cleaner, better work on the Multiplex Hammond. Tell us what your business or vocation is and our Service Department will give you *free*, full details of the particular Multiplex Hammond that is best adapted to your needs.

Our new mathematics folder will be sent to you, free. Write for it *now*—sign and mail the Coupon below, and mail to—
